# Licht ist Leben

## Light is Life

### La luce è vita

Alle Kulturen betonen den außerordentlichen Einfluß des Lichtes auf unser Fühlen und Denken. Licht ist die starke, lebensspendende Energie.

Mit dem richtigen Licht entsteht Stimmung, Harmonie, Wohlbefinden, Glück, Geborgenheit.

Eine Leuchte ergänzt den Raum und die Möblierung, ja fördert sie. Besonders abends ist die Leuchte wesentlicher Teil der Einrichtung: sie prägt und schafft Emotionen – positiv. Form und edle Materialien fördern Schönheit, Harmonie und Wohlbefinden.

Nur das Beste besteht.

Evolution ersetzt Mode und Revolution. Kristall-Leuchten haben diese besondere Qualität. Sie sind zeitlos und bleiben immer aktuell. Sie vermitteln das Edle und die Vollkommenheit.

Ob konventionelle oder avantgardistische Einrichtung: Ihre Kristall-Leuchte finden Sie bei uns.

Sie paßt zu Ihnen – zu Ihrer Einrichtung. Sie übertrifft Ihre Vorstellungen. Sie ist die schönste Beleuchtung, die sich immer wünschen und alle Ihre Träume wahr werden läßt – jetzt. Sie begeistert Sie und andere unendlich. Sie beflügelt Ihre Fantasie. Sie ist wertbeständig. Und sie ist immer aktuell, hochwertig und geschmackvoll.

Denn Klassisches wie Modernes gehorcht den gleichen Prinzipien: denen der Harmonie und Schönheit. Klassisch – ja, altmodisch – nein; modern, aber nicht gekünstelt modernistisch: so ist Ihr Anspruch.

Die chinesische Harmonielehre Feng Shui betont zu Recht die Wichtigkeit der Form und den überaus positiven Einfluß von Kristall und Gold.

All cultures emphasise the extraordinary influence of light on how we feel and think. Light is the ultimate source of powerful, life-giving energy.

The right kind of light creates harmony, a pleasant atmosphere, happiness, a sense of well-being, comfort and relaxation.

A chandelier complements space and furnishings as well as enhancing them. Light is an extremely important part of interior design – it creates positive emotions. Fine forms and materials foster beauty, harmony and a sense of well-being.

Only the best prevails.

Evolution outlasts fashion and revolution. Crystal chandeliers possess this special quality. They are timeless, and yet always remain up-to-date. They radiate nobility and perfection.

Whether your interior design is conventional or avantgarde, we have just the crystal chandelier to harmonise with it.

It suits you – and your décor. It surpasses your expectations. It is the finest illumination you could wish for, and makes all your dreams come true – now. It is an endless source of delight to you and to others. It fires your imagination. It always retains its value. And it is always up-to-date, high-quality and tasteful.

Because classical and modern share the same principles – those of harmony and beauty. Classical, yes – but not old-fashioned. Modern, but not 'modernist'. That is what is needed.

Feng Shui, the Chinese teaching of harmony, rightly emphasises the importance of form, and the highly positive influence of crystal and gold.

Tutte le culture hanno messo in evidenza come la luce influisca sul nostro stato d'animo e sui nostri pensieri. La luce è energia vitale.

La luce crea atmosfera ed armonia, infonde benessere, gioia e sicurezza.

Un lampadario completa l'ambiente e impreziosisce l'arredamento. Soprattutto di sera l'illuminazione diventa l'elemento fondamentale in un ambiente, dando origine ad emozioni positive. Forme e materiali pregiati accentuano la bellezza, l'armonia e le sensazioni di benessere.

Solo il meglio sopravvive.

L'evoluzione prende il posto della moda e della rivoluzione. I lampadari in cristallo hanno questa particolare qualità: sono classici ma sempre attuali, comunicano un senso di perfezione e di raffinatezza.

Arredamento convenzionale o d'avanguardia? Da noi troverete il "Vostro" lampadario in cristallo.

Scelto da Voi, adatto alla Vostra casa, al di là delle Vostre aspettative. È il lampadario più bello, quello che avete sempre desiderato, la realizzazione del Vostro sogno. Semplicemente prezioso ed entusiasmante, sempre attuale, sempre elegante.

I concetti di classico e moderno sottostanno agli stessi principi di armonia e di bellezza. Il motto è: classico ma non *démodé*, moderno ma non eccessivo.

Il Feng Shui, disciplina cinese dell'armonia, sottolinea l'importanza delle forme e l'influenza oltremodo positiva del cristallo e dell'oro.

## *Unsere Fabrik · Our Factory · La nostra azienda*

Ein besonderes Produkt entsteht nur in einem entsprechenden Umfeld (siehe oben).

Von unseren begeisterten, sehr liebe- und hingebungsvollen Mitarbeitern für Sie geschaffen.

Die in vielen Dingen einmalige Fabrik und unsere Mitarbeiter sind Ausdruck unserer Unternehmensphilosophie: dem Streben nach Perfektion und Schönheit.

Hier entstehen erreichbare Kunstwerke, keine industrielle, gesichtslose Massenware. Das spürt und sieht man. Intuitiv und objektiv.

Schönheit ist ein tägliches Geschenk.

A special product can only be produced in a special environment (see above).

Created especially for you by our highly committed employees.

Our factory – unique in many respects – and our employees are an expression of our corporate philosophy: the striving for perfection and beauty.

No faceless, mass-produced items here: these are accessible works of art. This can be felt and sensed, both intuitively and objectively.

Beauty is a daily gift.

Un prodotto particolare ha origine soltanto in un contesto altrettanto particolare (vedi sopra).

Creato per Voi dai nostri entusiasti ed appassionati collaboratori.

Un'azienda per molti aspetti unica nel suo genere, dove i nostri collaboratori sono la espressione della nostra filosofia: la ricerca della perfezione.

Qui nascono opere d'eccezione, non anonimi prodotti di massa. Si vede e si sente, con intuizione ed obiettività.

La bellezza è un dono quotidiano.

## Über uns

## About Us

## La nostra azienda

Seit 45 Jahren stellen wir Kristall-Leuchten der Weltspitzenklasse in einer wohl einmaligen Auswahl her. Für Sonderwünsche sind wir immer aufgeschlossen – mit Freude.

FAUSTIG ist ein sehr gut funktionierendes Familienunternehmen mit klarer Ausrichtung. Übliches kaltes Profitstreben ist uns fremd; Freude am kompromißlos Schönen und Guten ist uns überaus wichtig.

Von Anfang an sind Ästhetik und Qualität unser Streben, unser Sein.

Immer weiter treiben wir Entwicklung und Optimierung voran. Bestmögliche Qualität, Design, Beratung und Service sind Unternehmensphilosophie.

Wir sind nicht der einzige Anbieter, nicht der älteste, nicht der billigste und auch nicht der teuerste. Wir möchten der beste sein – von Herzen. Und Sie deshalb als Kunden gewinnen.

Wir gehen auf Sie ein und realisieren Ihre Wünsche. Durch überzeugende Beratung und erstklassigen Service.

Der überwiegende Teil unserer Aufträge kommt von langjährigen Kunden oder aufgrund deren Empfehlung. Diese zufriedenen Kunden sind unsere beste Referenz.

Ihre Wünsche sind uns Ansporn und Herausforderung zugleich.

For 45 years now we have been manufacturing what is probably a quite unique selection of world-class crystal chandeliers. We are always open to special requests – indeed, we welcome them.

FAUSTIG is a family firm that functions smoothly and has a clear orientation. The usual striving for profit is alien to us; what motivates us is delight in the uncompromisingly beautiful and good.

From the very start, we strive for aesthetics and quality – they are our *raison d'être*.

We continually develop and optimize our products. The best possible quality, design, consulting and service – that is our corporate philosophy.

We are not the only maker of crystal chandeliers, nor the oldest, the cheapest, or the most expensive. Our objective, quite simply, is to be the best – and thus win you as our customer.

We listen to you, and realize your wishes. With convincing consulting and first-class service.

Most of our orders come from customers of many years' standing, or as a result of recommendations from them. These satisfied customers are our best reference.

Your wishes serve as a stimulus and a challenge to us.

Da 45 anni produciamo una vastissima gamma di pregiati lampadari in cristallo e siamo sempre lieti di soddisfare i desideri particolari della nostra clientela.

FAUSTIG è un'azienda a conduzione familiare, leader nel settore, con dei chiari obiettivi. Il mero profitto è un concetto che non ci appartiene. La cosa più importante per noi è infondere gioia attraverso la bellezza e la qualità.

Sin dal principio, infatti, estetica e qualità sono state il nostro obiettivo, la nostra essenza.

Da sempre puntiamo sullo sviluppo e sull'ottimizzazione dei nostri processi. La nostra filosofia aziendale si basa su qualità, design, consulenza e servizio.

Non siamo né gli unici ad offrire questo prodotto, né i più economici, ma non siamo neppure i più cari. Vogliamo solo essere i migliori, con tutta la nostra passione, per conquistarVi.

Desideriamo ascoltarVi ed esaudire i Vostri desideri, mettendoVi a disposizione la nostra consulenza professionale ed il nostro servizio efficiente.

La maggior parte degli ordini proviene dai nostri clienti più affezionati che, a loro volta, parlano di noi ad altre persone. La loro soddisfazione, infatti, è la nostra migliore referenza.

I loro desideri sono per noi, allo stesso tempo, uno stimolo e una sfida.

*Unser Ausstellungsraum · Our Exhibition Hall · La nostra show room*

## Über Design Design Il design

Wir entwickelten neue Technologien der optimalen Gestaltung und Präsentation (siehe auch Seite 8).

Ästhetik und Stilsicherheit ist das erkennbare Markenzeichen unserer Leuchten.

Kopien sind bestenfalls mittelmäßig und können niemals unser Original ersetzen.

We have developed new, optimized production and presentation technologies (cf. also page 8).

Our chandeliers are characterised by their aesthetics and their sureness of style.

Copies are mediocre at best, and can never be any substitute for our originals.

Da sempre puntiamo a nuove tecnologie per una progettazione ed una presentazione sempre più accattivante (vedi pag. 8).

Estetica e design sono gli aspetti inconfondibili che contraddistinguono i nostri lampadari.

Nel migliore dei casi, le copie sono mediocri, e, comunque, mai in grado di sostituire l'originale.

## Qualität ist dehnbar

## Quality is Subjective

## C'è qualità e qualità

Von Qualität reden viele, aber wenige halten, was alle versprechen.

Wir verwenden aus Prinzip nur beste Materialien; auch an Details wird nicht gespart. Deswegen sind wir auch anders als andere.

Nur bestes Messing und Bronze sind uns für unsere Leuchten und unsere Kunden gut genug. Von billigem, rostendem Eisen halten wir nichts. Statisch besonders beanspruchte Teile fertigen wir aus Edelstahl.

Selbst für unwichtig gehaltene Fertigungsdetails haben unsere volle Aufmerksamkeit; so sind alle Lötverbindungen mit bestem Silber hartgelötet. Und somit verbrauchen wir pro Jahr -zig Kilo Silber für etwas, was so völlig nebensächlich erscheint.

Alle anderen Teile, wie z.B. unser elektrisches Installationsmaterial, werden mit der gleichen Sorgfalt und Liebe ausgewählt; nur Gutes hat Bestand. Schließlich werden unsere Leuchten viel aushalten: vom Dauereinsatz in öffentlichen Gebäuden bis zur Beleuchtung hochseegängiger Schiffe.

Perfekte Oberflächenvergütung überdauert die Zeit. Gerade hier darf nicht gespart werden, sonst ist der Totalverlust vorprogrammiert.

Selbst aggressives Seeklima darf im Extremfall nichts ausmachen. Wir haben Kunden in fast jedem Land der Welt, und kennen nur zu gut die extremen Anforderungen.

Die Oberflächenveredlung führen wir im eigenen Hause durch. Kompromißlos.

Wenn Sie langfristig Freude an ihren Kristall-Leuchten haben wollen, sollten Sie diesen entscheidenden Faktoren besondere Beachtung schenken.

Wir sind stolz darauf, daß selbst unsere Mitbewerber von unserer meisterhaften Verarbeitung schwärmen. Viele unserer Kunden sehen sie als entscheidend an.

Many people talk about quality, but very few keep their promises.

We only use the very best materials on principle, and we do not save on details either. That makes us different from others.

Only the very best brass and bronze is good enough for our chandeliers and for our customers. No cheap, rusty iron from us. We use stainless steel for all the parts subject to static stress.

We pay the closest attention to production details that most people consider unimportant: all our soldered joints, for instance, are hard-soldered with finest-quality silver. We thus use up kilos and kilos of silver annually on something that at first may seem to be of only secondary importance.

All other components, such as our electrical installation material, are selected with the same care and devotion. Only the best endures. Our chandeliers have to withstand a great deal, after all: from long-term use in public buildings to providing light for ocean liners.

Perfect surface coating stands up to the tests of time. Money should be no object here, otherwise total loss of value is a foregone conclusion.

In extreme cases, even an aggressive maritime climate should pose no problems. We have customers in almost every country of the world, and are all too familiar with the challenge posed by climatic extremes.

We carry out surface refinement at our own factory. Uncompromisingly.

If your crystal chandelier is to provide you with many years of lasting pleasure, you should take these decisive factors carefully into account.

We are proud of the fact that even our competitors admire our masterly craftsmanship. Many of our customers regard it as decisive.

Molti parlano di qualità ma pochi mantengono le promesse.

Noi scegliamo solo i materiali migliori, senza perdere di vista neppure il più piccolo dettaglio. Forse è proprio questo che ci differenzia dagli altri.

Solo ottone e bronzo particolarmente pregiati sono all'altezza dei nostri lampadari e delle aspettative dei nostri clienti; il ferro a buon mercato, che arrugginisce, non fa al caso nostro. I pezzi, particolarmente importanti per la statica, sono tutti in acciaio inox. Dedichiamo la massima attenzione anche ai dettagli che potrebbero sembrare trascurabili: le saldature, per esempio, vengono effettuate in argento, impiegato in grandi quantità.

Gli altri componenti, come p.e. il materiale elettrico d'installazione, vengono selezionati con la stessa cura e la stessa attenzione; solo la qualità dura nel tempo.

I nostri lampadari resistono a qualsiasi uso: da quello prolungato negli edifici pubblici a quello sulle navi da crociera.

Una buona superficie dura per sempre: per non compromettere il risultato, non badiamo a spese.

Persino il clima marittimo non ne pregiudica l'estetica. Abbiamo clienti in quasi ogni paese del mondo e conosciamo fin troppo bene le loro diverse esigenze.

La lavorazione della superficie viene effettuata da noi, senza compromessi.

Se volete goderVi a lungo il Vostro lampadario di cristallo dovrete valutare attentamente questi fattori determinanti.

Siamo orgogliosi che anche la concorrenza ammiri la nostra tecnica di lavorazione. Molti dei nostri clienti la considerano un elemento importantissimo.

*Unsere computergesteuerte Vergoldungsanlage*

*Our computer-controlled gold-plating plant*

*Il nostro impianto computerizzato per la lavorazione della superficie*

Sie können unter folgenden Oberflächen wählen:

- vergoldet (normale Oberfläche)
- vergoldet, patiniert = ANT
- versilbert = SI
- vernickelt = NI
- Zinn-Nickel (schwarzblau) = ZN
- andere Oberflächen auf Wunsch

Alle Oberflächen sind dauerhaft mit einer eingebrannten Lackierung höchster Resistenz versiegelt; es gibt keinen besseren Schutz.

The following choice of finishes is available to you:

- gold-plated (normal finish)
- gold-plated, patina finish = ANT
- silver-plated = SI
- nickel-plated = NI
- tin-nickel-plated finish (bluish-black) = ZN
- other finishes on request

All finishes feature a long-lasting, extra-high-resistance coating of protective varnish, oven baked – we know of no better.

Potete scegliere fra le seguenti superfici:

- doratura (superficie normale)
- doratura patinata = ANT
- argentata = SI
- nichelata = NI
- stagno-nichel (canna di fucile) = ZN
- altre superfici a piacere

Tutte le superfici sono particolarmente resistenti grazie ad un'eccezionale laccatura protettiva a forno.

# Die größte und komplexeste Kristall-Leuchte der Welt

## The Largest and Most Complex Crystal Chandelier in the World

### Il più grande e complesso lampadario del mondo

Im Jahr 2000 stellten wir eine einmalige Leuchte fertig. Ein wahres Meisterstück, das alle Dimensionen in Größe und Design sprengt.

Neueste Techniken der dreidimensionalen Präsentation und Konstruktion wurden von uns entwickelt und eingesetzt. Es paßte alles - auf 1/10 mm.

Eine zweidimensionale Entwurfszeichnung kann beeindrucken, weicht aber zumeist von einer dreidimensionalen Präsentation ab, wo alles aus allen Winkeln betrachtet stimmt. Nur so können Sie – der Kunde – sicher sein, daß das Ergebnis Ihren Erwartungen entspricht.

Das Gestell wurde aus Edelstahl gefertigt, der statischen Stabilität und Rostfreiheit halber, und mit vergoldeten Messingprofilen verkleidet. Alle weiteren Metallteile bestehen aus Messing, Bronze und meerwasserfestem Aluminium (um Gewicht zu sparen), natürlich alles 24 Karat vergoldet und einbrennlackiert. Das hält für die sprichwörtliche Ewigkeit, trotz Meeresnähe und heiß-feuchtem Klima.

Im Inneren der Leuchte gibt es sogar eine Treppe und Plattformen - der Wartung halber.

Verwendet wurde nur das feinste Kristall - Swarovski Strass®. Etwa eine Million Kristalle funkeln wie Diamanten.

Über 36 Schaltkreise werden an die 1.200 dimmbare Halogenlampen angesteuert.

Das Gewicht beträgt fast 9.000 Kilo.

In the year 2000 we manufactured a unique chandelier. A veritable masterpiece, far beyond anything comparable in terms of both size and design.

We developed and made use of the very latest three-dimensional presentation and construction techniques for the project. It was all a perfect fit – down to one-tenth of a millimetre.

A two-dimensional design drawing can be impressive, but the advantage of a three-dimensional presentation is that everything can be observed from all angles. Only in this way can customers be certain that the results are up to their expectations.

The frame was made from stainless steel to keep it statically stable and free from rust, and then encased in gold-plated brass profiles. All the other metal components are of brass, bronze and seawater-resistant aluminium (to save weight) – all of it naturally plated with 24-carat gold and stove-enamelled. Despite its location near the sea, in a hot and damp climate, the chandelier will literally last for ever.

The chandelier even contains a staircase and platforms – for maintenance purposes.

Only the finest crystal was used - Swarovski Strass®. Roughly one million crystals, all sparkling like diamonds.

Around 1,200 dimmable halogen lamps are triggered by more than 36 switching circuits.

The entire chandelier weighs almost 9,000 kilos.

Nel 2000 abbiamo realizzato un lampadario unico nel suo genere, un vero capolavoro che supera qualsiasi dimensione e design.

A questo scopo abbiamo sviluppato e messo in opera tecniche d'avanguardia, di progettazione e presentazione tridimensionale. Tutto era perfetto al decimo di mm.

Un progetto bidimensionale può sicuramente colpire, ma si differenzia molto da una presentazione tridimensionale che permette di verificarne la precisione da ogni angolazione. Solo così Voi, e quindi il cliente, potrete essere sicuri che il risultato sia all'altezza delle Vostre aspettative.

Per garantire stabilità e resistenza alla ruggine, la struttura è stata realizzata in acciaio inox e rivestita con profili in ottone, bronzo e alluminio resistente all'acqua di mare (per alleggerirne il peso), ricoperti da una doratura di 24 carati e laccati a forno, per garantire la proverbiale "vita eterna", sfidando il clima marittimo e l'umidità.

All'interno del lampadario sono state integrate addirittura una scala e delle piattaforme che agevolano la sua manutenzione.

Il pregiato cristallo Swarovski Strass® è stato impiegato per la realizzazione di circa un milione di gocce che brillano come diamanti.

Attraverso 36 circuiti vengono controllate ben 1.200 lampade alogene ad intensità regolabile.

Il peso è di circa 9.000 chili.

# GUINNESS BOOK OF RECORDS

## CERTIFICATE

After careful verification, the GUINNESS BOOK OF RECORDS  
confirms the following achievement:

The firm of Kurt Faustig KG from Stockdorf in Germany manufactured  
a crystal chandelier 8 metres across and 14 metres high for a mosque.  
The chandelier has 1,114 lampholders, and weighs 8,500 kilograms.  
All the metallic components were coated with 24-carat gold.  
The chandelier has been hanging in Oman since December 2000.

  
PETER LIN  
REDAKTION  
GUINNESS BUCH DER REKORDE

Die gewaltige Größe der Leuchte

- 8 m Durchmesser
- 14,50 m Höhe
- vergleichbar mit einem fünfstöckigen Wohnblock

kann in einer Abbildung (siehe links) leider nicht dargestellt werden. Die scheinbar kleinen Leuchten unter der großen haben bereits nahezu drei Meter Durchmesser. Der Eindruck im Raum ist schier überwältigend.

Oben sehen Sie eine Unteransicht der Leuchte. Ihre harmonische Anpassung an die großartige Innenarchitektur der Moschee besticht.

The enormous size of this chandelier

- 8 m diameter
- 14.50 m high
- comparable to a five-storey residential building

cannot, unfortunately, be shown in a picture (see left). Although they appear small, the chandeliers beneath the large one are almost three metres in diameter. The overall impression is awe-inspiring.

Above you can see a view of the chandelier from below. It harmonizes most appealingly with the magnificent interior architecture of the mosque.

A questo gigantesco lampadario

- diametro 8 m
- altezza 14,50 m
- paragonabile ad un edificio di cinque piani

una semplice foto (a sx) non fa onore. I singoli lampadari intorno al lampadario centrale, all'apparenza piccoli, hanno in realtà un diametro di tre metri. L'effetto all'interno dell'ambiente è strabiliante.

Qui sopra è rappresentato questo lampadario visto dal basso. Colpisce particolarmente la sua armonica integrazione con la straordinaria architettura interna della moschea.

# Sonderanfertigungen klassischer Leuchten

## Special makes of classical chandeliers

### Produzione speciale di lampadari classici

Wir stellen laufend Sonderanfertigungen jeder Art und Größe her; unsere Möglichkeiten sind nahezu unbegrenzt.

Die auf den folgenden Seiten gezeigten Modelle sind nur ein repräsentativer Ausschnitt aus einer Kollektion von weit über 10.000 Modellen, von sehr modern bis klassisch.

Gerne beraten wir Sie ausführlich und fertigen Entwürfe nach Ihren Bedürfnissen.

Eine Referenzliste durchgeführter Projekte senden wir Ihnen gerne zu.

Fordern Sie uns !

We manufacture special models of every type and size on a regular basis; our possibilities are almost limitless.

The models shown here on the following pages are only a representative extract from a collection featuring well over 10,000 different models, from ultra-modern to classical.

We shall be most happy to provide you with detailed advice, and to manufacture the design that suits your requirements.

A list of references regarding projects we have already completed is at your disposal.

Put us to the test !

Produciamo continuamente modelli speciali di qualsiasi tipo e grandezza; le nostre possibilità sono pressoché illimitate.

I lampadari esposti sono solo una parte che rappresenta una collezione la quale supera abbondantemente i 10.000 modelli; comprendono esemplari molto moderni ma anche classici.

Siamo lieti di offrirVi la nostra consulenza e di elaborare dei progetti secondo il Vostro fabbisogno.

A Vostra richiesta, Vi sottoponiamo una lista con i progetti che abbiamo portato a termine.

Gerade klassische Leuchten in Sondergrößen müssen sehr sorgfältig geplant werden, damit die Proportionen stimmen.

Wichtig ist die Verwendung großer Kristalle.

Classical chandeliers in special sizes have to be planned very carefully to ensure that the proportions are correct.

The use of large crystals is important.

I lampadari classici di dimensioni particolari devono essere progettati nei minimi particolari, affinché le proporzioni siano ideali.

Importante è l'uso di grossi cristalli.

# Unsere Katalog-Kollektion

## Our catalogue collection

### La nostra collezione generale

#### Das Nummern-System

Die fünfstellige Zahl bezeichnet die Modellnummer; nach einem Querstrich folgt je nach Art des Modells entweder die Flammenanzahl (z.B. 40600/8) oder der Durchmesser (z.B. 25900/93). Steht zwischen den beiden Bezeichnungen noch eine mit einem Punkt gekennzeichnete Zwischennummer (z.B. 40600.5/2), bedeutet diese

- .2 = Halogen-Einbauleuchte (ohne mitgelieferten Trafo)
- .4 = Hockerleuchte
- .5 = Wandleuchte
- .6 = Bodenstehleuchte
- .7 = Deckenleuchte mit Reflektor, ohne Kette und Baldachin
- .8 = Tischleuchte
- .9 = Spiegel

#### Maßangaben

Alle angegebenen Maße sind in cm und annähernd. Die erste Zahl nach dem Symbol ↔ gibt den Durchmesser (Breite) der Leuchte und die zweite nach dem Symbol † deren Höhe ohne Kette an. Bei Leuchten mit Aufhängestange bezeichnet eine Zahl in Klammern die Höhe einschließlich Stange. Bei Wandleuchten und Spiegeln ist die Tiefe durch eine dritte Zahl nach dem Symbol ‡ vermerkt.

#### Elektrische Installation

Falls nicht anders in Auftrag gegeben, werden unsere Leuchten je nach Modell mit Fassungen E14 (♂) und E27 (♀) ausgerüstet. Für den Export sind B15d Bajonett-Fassungen, US-Candelabra und japanische E17-Fassungen ohne Aufpreis verfügbar. HAL bedeutet Ausrüstung der Leuchte mit 220V Transformator (oder auf Wunsch 110V) für Halogen-Lampen 12V in 10-20W. Halogen-Einbauleuchten .2 werden ohne Transformator geliefert. Einige HAL-Leuchten können auf Wunsch mit Normalfassungen gefertigt werden. Die Verkabelung ist für 110-240 Volt geeignet. Alle Leuchten entsprechen den international gültigen Normen und sind entsprechend zertifiziert. Jede Leuchte wird mit 5.000 Volt geprüft.

#### Empfohlene Lampen

Lampen sind nicht im Leuchtenpreis enthalten, können aber gegen Berechnung mitgeliefert werden. Wir empfehlen nur klare Kerzen in gedrehter oder glatter Ausführung.

Für normale Beleuchtungen sind 25W ausreichend, 40W oder 60W jedoch möglich. Es gibt auch Hochvolt-Halogen-Lampen mit E14 oder E27 Fassung (bessere Lichtausbeute bei weniger Stromverbrauch und Wärmeentwicklung, längere Lebensdauer). Für Fassungen E27 genügen klare Lampen 60W. Ferner verwenden wir, wo angegeben, G9 Fassungen für G9 Hochvolt-Halogenlampen. Niedervolt-Halogenleuchten sind mit Lampen 12V/10-20W auszurüsten.

#### Dimmer

Wir empfehlen den Einsatz von groß dimensionierten Dimmern, deren Elektronik möglichst im Schaltschrank eingebaut sein sollte. Dann können Sie Lampen höherer Wattzahl einsetzen, welche je nach Ihren Bedürfnissen geregelt werden können und bei geringerer Belastung wesentlich länger halten.

#### Aufhängung

Die normale Kettenlänge ist ca. 80 cm. Sollten Sie bei Auftragserteilung eine andere Kettenlänge wünschen, entsteht kein Mehrpreis. Schwere Leuchten sind zusätzlich mit einem Inox-Sicherheitsseil ausgerüstet. Für größere, hoch hängende Leuchten liefern wir auf Wunsch mechanische oder elektrische Winden, welche die Wartung erleichtern.

#### Ersatzteile

Die wichtigsten Ersatzteile werden mit jeder Leuchte gratis mitgeliefert. Weitergehende Ersatzteilanforderungen werden in der Regel am gleichen Tag erledigt. Bitte schicken Sie jeweils ein Muster, wenn auch gebrochen, ein.

#### Reinigung und Pflege

Nach einem weit verbreiteten Vorurteil sollen Kristall-Leuchten schwer zu pflegen sein. Wir haben die Probleme erkannt und durch anwenderfreundliche Konstruktion, als auch bei uns erhältliche Hilfsmittel und Reinigungsanleitungen gelöst. Insbesondere verhindert der Oberflächenschutz der STRASS-Kristalle (siehe Seiten 216-220) sowie unserer Metallteile Verschmutzungen bisher gekannten Ausmaßes.

#### Numbering System

The five-figure number refers to the type number; then, after a diagonal, either the number of bulbs (e.g. 40600/8) or the diameter (e.g. 25900/93) is indicated, depending on the type of fitting. If there is an intermediate figure preceded by a full stop (e.g. 40600.5/2) between the two descriptions, this refers to

- .2 = halogen fitted recess lamp (transformer not included in delivery)
- .4 = end table lamp
- .5 = wall bracket
- .6 = floor lamp
- .7 = close-to-ceiling lamp with reflector, without chain or canopy
- .8 = table lamp
- .9 = mirror

#### Dimensions

All measurements are indicated in cm, and are approximate values. The first figure after the ↔ symbol refers to the diameter (width) of the fitting, and the second figure after the † symbol refers to its height without chain; in the case of chandeliers with suspension rods, a figure in brackets refers to the height including the rod. In the case of wall brackets and mirrors, a third figure after the symbol ‡ shows their depth.

#### Electrical Installation

Unless otherwise indicated in your order, our chandeliers are equipped with either sockets E14 (♂) or E27 (♀). B15d bayonet sockets, US Candelabra and Japanese E17 sockets are also available for export without extra charge. HAL means that the fitting is equipped with a 220V transformer (or 110V upon request) for 12V/10-20W halogen bulbs. Halogen fitted recess lamps .2 are delivered without the transformer. Some HAL lamps can be fitted with normal sockets upon request. The cabling is suitable for 110-240 volts. All chandeliers conform to internationally valid norms and are duly certified. Each chandelier is tested with 5000 volts.

#### Recommended Bulbs

Bulbs are not included in the chandelier price, but can be delivered at extra charge. We recommend only clear candle bulbs, twisted or plain, 25W bulbs

are adequate for normal illumination purposes, though 40W or 60W bulbs may also be used. High-voltage halogen lamps with E14 or E27 sockets (improved light efficiency with less power consumption and heat build-up, longer service life).

Where indicated we also use G9 sockets for G9 high-voltage halogen lamps.

Low-voltage halogen lamps need to be fitted with 12V/10-20W bulbs.

### Dimmers

We recommend the use of large-scale dimmers, with electronics that can be built into the switchboard panel if possible. This enables bulbs of higher wattage to be used – they may be adjusted to suit your requirements, and the lower load also means that they last a lot longer.

### Lamp Installation

The normal length of chain used is approximately 80 cm. Should you require a different length when placing your order, no additional charge will be made.

Heavy fittings are also equipped with an extra stainless steel safety cable.

For larger fittings that are installed at quite a height we also provide mechanical or electric winch mechanisms upon request, which make maintenance a great deal easier.

### Spare Parts

Essential spare parts are delivered free of charge with each fitting. Any additional spare parts required are normally sent the same day. Do please send the sample, though, even if it is in fragments.

### Care and Maintenance

According to a widespread misconception, crystal chandeliers are supposed to be difficult to clean. We have taken note of the possible problems and solved them via user-friendly design as well as various maintenance materials that we provide.

The novel surface protection on the STRASS crystals (see pages 216-220) and also on our metal parts is particularly successful at preventing tarnishing or deterioration of any kind.

### Significato dei numeri

Il numero a cinque cifre indica il numero del modello; dopo la barra segue, a seconda del tipo, il numero delle luci (ad es.: 40600/8) o il diametro (ad es.: 25900/93).

L'eventuale numero contrassegnato da un punto, interposto fra le altre due designazioni (ad es.: 40600.5/2), indica:

- .2 = lampada alogena ad incasso (consegnata senza trasformatore)
- .4 = lume da tavolo
- .5 = applique
- .6 = lampada da terra
- .7 = plafoniera con riflettore, senza catena da montare al soffitto
- .8 = lumetto
- .9 = specchiera

### Dimensioni

Tutte le misure indicate sono in cm e approssimative. La prima cifra dopo il simbolo  $\leftrightarrow$  indica il diametro (larghezza) del lampadario e la seconda dopo il simbolo  $\updownarrow$  l'altezza senza catena. Per i lampadari con la sbarra, un numero tra parentesi, indica l'altezza, comprendendo la stanga. Per le applique e le specchiere la profondità è contrassegnata da un terzo numero dopo il simbolo  $\perp$ .

### Impianto elettrico

Salvo diversamente pattuito in sede di ordinazione, i nostri lampadari sono corredati, a seconda del modello, con portalampade E 14 ( $\emptyset$ ) e E 27 ( $\emptyset$ ). Per l'esportazione sono a disposizione, senza sovrapprezzo, portalampade B15d, US-Candelabra e portalampade giapponesi E 17. HAL sta a indicare che il lampadario è provvisto di un trasformatore di 220 V (o a richiesta di 110 V) per lampade alogene 12 V di 10-20 W. Lampade alogene ad incasso .2, vengono consegnate senza trasformatore. Alcuni lampadari HAL, a richiesta, possono essere fabbricati con portalampade normali. I cavi sono adatti a 110-240 Volt. Tutti i lampadari corrispondono alle norme internazionali in vigore e sono muniti di corrispondente certificato. Ogni lampadario viene sottoposto ad un test con 5.000 volt.

### Lampadine

Le lampadine non sono incluse nel prezzo del lampadario. Però le possiamo consegnare, fatturandole separatamente. Noi raccomandiamo solo lampadine trasparenti lisce o a tortiglione. Per un'illuminazione normale sono sufficienti lampadine da 25W, però è sempre possibile sostituirle con lampadine da 40W o 60W.

Ci sono anche lampade alogene ad alto voltaggio con portalampade E14 oppure E27 (migliore luce con meno consumo e sviluppo di calore, maggiore longevità).

Per i portalampade E27 sono sufficienti lampadine chiare di 60W. Inoltre adoperiamo, dove menzionato, portalampade G9 per lampade alogene G9 ad alto voltaggio. Lampade alogene a basso voltaggio devono essere munite di lampadine 12V/10-20W.

### Varialuce

Noi consigliamo l'impiego di varia-luci di grandi dimensioni, la cui elettronica può essere possibilmente incorporata nel quadro elettrico ad armadio. Così potrete adoperare lampadine che abbiano un maggior numero di Watt e la cui luminosità può essere regolata a Vostro piacere, tenendo presente che, se non vengono sfruttate sempre al massimo della loro capacità, durano più a lungo.

### Sospensione

La normale lunghezza della catena è di ca. 80 cm. Nell'ordine può essere richiesta una catena con altre dimensioni, senza sovrapprezzo. I lampadari pesanti sono inoltre muniti di un sostegno di sicurezza in acciaio inossidabile.

Per lampadari di grandi dimensioni che vengono montati ad una certa altezza, a richiesta forniamo verricelli meccanici o elettrici, i quali facilitano di molto la manutenzione.

### Pezzi di ricambio

I più importanti pezzi di ricambio vengono forniti gratuitamente assieme ad ogni lampadario. Successive richieste di pezzi di ricambio sono evase di regola a stretto giro di posta. Vi preghiamo di inviarci rispettivamente un campione, anche se rotto o danneggiato.

### Cura e pulizia

Secondo alcuni pregiudizi, la pulizia di lampadari di cristallo dovrebbe essere molto difficile. Noi ci siamo resi conto del problema e lo abbiamo risolto costruendo i nostri lampadari in modo pratico e offrendo allo stesso tempo dei prodotti adatti alla loro pulizia.

La nuova protezione per le superfici dei cristalli STRASS (vedi pagine 216-220) e per le parti in metallo evita particolarmente l'attacco della sporcizia.

## STRASS® Guarantee

### ► Das STRASS® Qualitätssiegel

Als Garantie für die unnachahmliche Qualität des Originals trägt jede einzelne geschliffene STRASS® Komponente (mit mehr als 12 mm Durchmesser) eine besondere Auszeichnung: Das laser-endografierte Qualitätssiegel. Dieses ist unauslöschlich in den Kristallkorpus integriert und gibt Ihnen die Sicherheit der Qualität des Originals.

### ► The STRASS® Signature

Each individual STRASS® cut-crystal item (over 12 mm diameter) carries a special certificate that guarantees the quality of the "original": the laser-engraved signature. This is indelibly etched into every STRASS® article.

### ► Il marchio STRASS®

Ogni singolo articolo di cristallo tagliato STRASS® (di oltre 12 mm di diametro) è corredato di uno speciale certificato che garantisce la qualità originale: il marchio di qualità inciso al laser. Il marchio è inciso all'interno del cristallo STRASS®.

### ► STRASS® - das Original

Seit mehr als 100 Jahren gilt Kristall aus dem Hause Swarovski als Inbegriff für höchste Brillanz und beste Qualität: Extrem hohe optische Reinheit des Kristalls, einzigartige Schliffpräzision, perfekte Politur und faszinierende Spektralfarben.

### ► STRASS® - the original

For more than 100 years, Swarovski crystal has personified the essence of extreme brilliance and best quality: extremely high optical purity of the crystal, unique cutting precision, perfect polish and fascinating spectral colours.

### ► STRASS® - l'originale

Da oltre 100 anni il nome Swarovski è sinonimo di massima brillantezza e qualità del cristallo: estrema purezza ottica abbinata ad un taglio e ad una lucidatura di altissima precisione ed a riflessi dall'incantevole spettro cromatico.

## STRASS® Innovations

### ► Die achteckige STRASS® Koppe "Lilie"

40 statt bisher 16 Facetten verleihen der neuen STRASS® Koppe perfekte Harmonie und deutlich intensivere Brillanz. Sie bereichert edle Leuchten mit glanzvollen Akzenten.

### ► The STRASS® Lily octagon

Instead of the previous 16 facets, 40 facets now give the new STRASS® octagon perfect harmony and more intense brilliance, adding iridescent tones to elegant lighting.

### ► L'ottagono STRASS® Giglio

Invece delle consuete 16 faccette, le attuali 40 faccette danno al nuovo ottagono STRASS® un'armonia perfetta e una brillantezza più intensa, aggiungendo toni cangianti a un'illuminazione elegante.

## STRASS® Quality Advantages

## Nur bestes Kristall

## Only the Very Best Crystal

## Solo il cristallo migliore

Als Spitzenerzeuger von Kristall-Leuchten legen wir größten Wert auf Kristall höchster Qualität.

Sofern nicht anders angegeben, werden unsere Leuchten mit Swarovski-Kristallen, bekannt unter der Marke STRASS®, ausgestattet. Über 30% Bleioxidanteil, präziser Schliff, makellose Politur und begeisternde Lichtbrechung ergeben das weltweit beste Kristall.

Für kleinere Budgets empfehlen wir die zweite Qualität von Swarovski, Spectra®. Dieses Kristall ist immer noch sehr gut.

Unser optisches Kristall und Behänge aus 24% Bleikristall sind in ihrer Klasse führend.

Behänge in guter Standard-Qualität runden das Angebot nach unten ab.

Nebenstehend zeigen wir Ihnen einige Kristalle aus unserem großen Sortiment.

As a leading producer of crystal chandeliers, we naturally ensure that the crystal we use is of the highest possible quality.

Unless otherwise indicated, our chandeliers are furnished with Swarovski crystal, also known under the brand-name of STRASS®. Its lead oxide content of over 30 %, sharp and precise cut, flawless polished finish and astonishing refractive brilliancy all combine to make it the best crystal available anywhere in the world.

For more limited budgets, we recommend the secondary quality from Swarovski, Spectra®. This crystal is still very good.

Our optical crystals and trimmings in 24% lead crystal are the very best in their class.

Fine standard quality decoration completes the assortment available.

Some of the many crystals from our broad assortment are depicted here.

Essendo i nostri lampadari di cristallo un prodotto di prima qualità, per noi è importante che anche la qualità del cristallo stesso corrisponda alle nostre esigenze.

Se non vi sono altre denominazioni, i nostri lampadari vengono prodotti con i cristalli Swarovski, conosciuti con il marchio Strass®.

Più del 30% di ossido di piombo, una molatura di precisione, una lucentezza ineccepibile ed uno spettro dei colori ad alta intensità sono gli elementi base per il miglior cristallo a livello mondiale.

Per un budget contenuto consigliamo la seconda scelta di Swarovski, Spectra®. Anche questo cristallo è di buona qualità.

Il nostro cristallo ottico e quello composto dall'24% di piombo sono nel loro genere i migliori.

Il cristallo standard di buona qualità può essere impiegato anche per la produzione di lampadari meno cari.

Qui a fianco, Vi mostriamo alcuni tipi di cristalli del nostro vasto assortimento.
