

EXCLUSIVNESS AND ELEGANCE OF LIGHT

Angiolo Sarri established the company Sarri in Sesto Fiorentino in March 1955. Since then all the models of lighting products and furnishing accessories that the company manufactures are exclusively created and produced in its workshop in Sesto Fiorentino, fulfilling the criteria of quality and tradition of a typical artisan production, cherishing the expertise and adapting it to the needs of our time. The ceramics, exported all over the world, are created paying consistent attention to the needs and the requests of different markets and are manufactured using materials of the highest quality. Each single piece is processed manually, refining the smallest details, and enriched with exclusive decorations made of gold, platinum, brass and Swarovski elements to give the collections a peculiar uniqueness, and is then appreciated by those loving exclusiveness and elegance.
